**Thinkpad L Series**

Perfect for users, even better for IT managers

Power packed and business ready, the ThinkCentre M Series, which includes the Tower, SFF, and Tiny, is the perfect choice for progressive IT managers looking for high-performance, reliable, and secure desktops.

For real results, you need real power

With the latest generation of Intel® processors, cutting-edge DDR4 memory, and the option of solid-state storage, the compact ThinkCentre M920 Tiny is as powerful and responsive as a full-sized desktop. It enables you to get more things done, more quickly—and with more elbow room, too.

It's good to have high-speed connections

When it comes to ports, the ThinkCentre M920 Tiny has plenty. It includes USB 3.1 Gen 2 technology for faster charging and data transfers, even if your PC is shut down or in sleep mode. The ports are placed conveniently, too—enabling you to hook up an extra hard drive or monitor in seconds.
