

Lenovo

BUILT FOR LIFE'S EXTREMES

A laptop as well-connected as you

When you're out and about, the X1 Carbon can keep you online even when there's no WiFi. Choose the optional LTE-A card and the WWAN technology lets your laptop function like a smartphone—where there's cellular service you can always jump online. And you can trust that your connection is secure.

We've got your back-and your front

Keep your business data—and your privacy—safe with the X1 Carbon laptop's comprehensive suite of ThinkShield security features. ThinkShutter, a physical camera cover, blocks the lens to ensure that you're only seen when you want to be. And the fingerprint reader uses biometrics to log you in with a simple touch.
