Professional Monitor

Minimal bezel, to help you to focus

Minimal bezel can help you to maximise concentration. The virtually bezel-less screen is designed to show you the full picture and can look almost gapless when used in a dual-monitor setup. Designed to help you to see with minimal distractions in your way, and helping you to get through larger sections of your to-do list during screen time.

True colours

Now, help the whole team to see. The IPS panel is designed to preserve colour vividness and clarity across practically every inch of the screen. Helping you to work comfortably on the wide display and see accurate tones and shades from 178° all around, with minimal colour washing.

IPS Panel

Wide Viewing Angle
