ThinkBook 14-IML

Power House of Performance

The performance to take you places

Designed for those on the go, the ThinkBook 14 is only 17.9mm thin so it's easy to slip it into a backpack or under your arm. And with Intel® Core™ i7 processor and Windows 10 Pro, this 35.56cms (14) business laptop enables you to tackle any task, anywhere.

A difference you can see & hear

The 35.56cms (14) FHD display is edged with narrow bezels, meaning a screen-to-body ratio of 80% and less distractions for you. There are also two Dolby Audio™ speakers delivering exceptional sound. And there's the option of discrete graphics for hi-res visual work, videos, or even some gaming.
