

# ThinkBook 13s

Where work & leisure unite

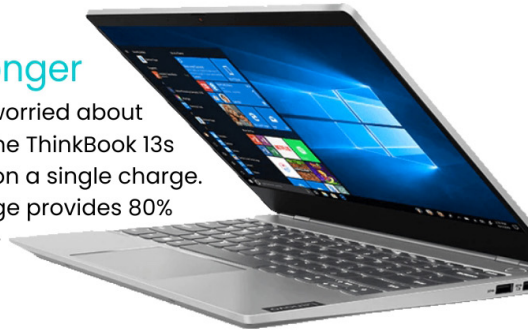

## Dazzle or be dazzled

The display on the ThinkBook 13s is as functional as it is attractive—you'll have a larger visible screen thanks to the thinner 5.5mm bezels. The FHD display includes dramatic Dolby Vision™ high-dynamic-range (HDR) technology, for increased brightness, expanded contrast, amazingly accurate colours, and more refined detail.

## Keeps you unplugged longer

When you're on the go, you can't be worried about finding electrical outlets. That's why the ThinkBook 13s delivers up to 11 hours of battery life\* on a single charge. And if you're running low, Rapid Charge provides 80% capacity in just an hour. So with a 60-minute layover, you can easily boost your battery up to nearly 9 hours.
