

# ThinkCentre M70s SFF

Big work from a small form factor

The ThinkCentre M70s small form factor desktop PC is meant to do big jobs.

At 8.2L, it saves space while working as hard as larger tower units.

Improve productivity and employee experience with its power and convenience, while its sustainable design keeps your company eco-friendly.

## Security inside and out

The compact M70s will be out of the way on top of your desk, but should you want to keep it underneath, you can turn it on from the keyboard. It supports up to three independent monitors, with plenty of ports to support other peripherals. Should you need to further configure your PC, its expansion slots make upgrades a snap..
