

ADD SOME **VIPER VENOM** TO YOUR BUILD

VIPER RGB

DUAL CHANNEL DDR4 TECHNOLOGY

The heat spreaders look and feel robust. They're a little thicker and taller than most, which certainly boosts the aesthetics as the heat spreader shape and size looks stunning.

When it comes to RGB lighting, the market is pretty saturated with similar products. Thankfully, the Patriot Viper is a shining light in a sea of inferior products. The LEDs are dazzling and the colors are quite literally jaw-dropping...

It's every bit as beautiful a kit of memory as we remember, and it performs better than we expected. As far as performance, it goes toe to toe with kits rated faster speeds and pretty well mops the floor with other 3000 MHz rated kits...

16GB RGB KIT (2x8GB) DDR4 Dual Channel

5 customizable lighting zones to illuminate your PC
